

RS-104 Mk II

2-way cinema speaker system

RS-104 Mk II Classic

2-way Cinema Surround Speaker System

The **PULZ RS-104 Mk II Classic** is a two-way cinema surround speaker system, designed as a cost effective solution for medium to large size cinema environments. The system features two 5¼" (135mm) long throw bass-mid drivers in a reflex enclosure working in conjunction with two 5¼" (135mm) high power full range drivers in a diamond configuration. The geometry and the internal crossover is optimised for wide horizontal and controlled vertical dispersion.

A sensitivity of 92dB and high power handling capacity ensures adequate performance even in larger auditoriums. The shape of the **RS-104 Mk II** allows easy wall mounting with a 14° downwards tilt. The black textured finish and slim-line construction mean the enclosure blends unobtrusively in the cinema auditoria.

Easy connectivity is ensured with spring loaded terminals, which can accept cables upto 4 sq. mm. area.

The **PULZ RS-104 Mk II** is a well engineered product which offers a solution to surround sound application at a price level never before possible.

features

- two-way design
- four heavy duty drivers
- full range
- simple to install
- rugged construction
- high power handling

technical

Frequency response	50Hz to 16KHz, ± 3dB
Low frequency limit	-10dB @ 40Hz
Power handling	200 W continuous programme
Sensitivity	92dB / 1 W / 1m
System Resonance	50Hz
Nominal impedance	8 nominal
Dispersion	90°H x 90°V (-6dB)
Low frequency driver	2 x 135mm Full Range 2 x 135mm Woofers
Volume	20.4 litres, reflex type
Connectors	Push-on binding post, up to 6.0 sq. mm
Dimensions	W 383mm x H 498mm x D 233mm
Cabinet finish	Black stipple finish
Grill	Black acoustically transparent cloth grille
Weight	9.00 Kg
Packed weight	10.5 Kg
